

IMAGINING TOMORROW: ALTERNATE ENERGY FUTURES

An Education and Outreach Opportunity for Clean and Renewable Energy

WITH SPONSORSHIPS AVAILABLE FOR YOUR COMPANY

IMAGINING TOMORROW IS AN ONGOING PROGRAM THAT CAN HELP YOU

- Reach your newest and most active customer base: to deliver your message, enhance your image, and build your brand recognition and loyalty;
- Educate the tens of thousands of students, families and communities across the nation who will be reached by this program;
- Promote clean energy policies and choices;
- And help shape a better future for ourselves and our children.

From the 2006 Pilot in Massachusetts:

Below: State Representative J. James Marzilli, Jr., chats with Emily Allen and Paul Jaffee, along with Paul's mother, Emily Rankin.

Above: Finalists from across the state.

Right: Mary Essary, congratulates Amanda Bennett from Sunderland; at thirteen, the youngest author in the top ten.

Imagining Tomorrow is an innovative and effective program about clean energy that completed a successful pilot run in Massachusetts in partnership with the Northeast Sustainable Energy Association, www.itomorrow.nesea.org, and had over 2,000 individual visitors to the website in the first year.

We are now expanding to a national program: www.itomorrow.theforesightproject.org.

OUR WORLD IS IN A RACE AGAINST TIME - OUR GOAL IS TO HELP WIN THAT RACE

BY:

- *Reaching, Involving and Motivating High-School Students: Our Next Generation of Voters, Consumers, Investors, and Active Citizens;*
- *Linking the Work of Existing Individual Programs, Organizations, and Events into a Tipping Point of Awareness by the General Public about Clean Energy Choices;*
- *And Creating an Educated, Urgent, and Sustained Demand for Change.*

IMAGINING TOMORROW: ALTERNATE ENERGY FUTURES

An Education and Outreach Opportunity for Clean and Renewable Energy

2007 National Sponsorship Levels

Sponsorship offers many marketing benefits for your organization, whether you are concerned about building brand recognition if you are working in the clean energy industry, or about helping to build a social responsibility brand image for your company, in almost any industry.

Your sponsorship also supports this important educational program, giving students an opportunity to understand the need for clean energy as well as building an awareness of the choices currently available to make this possible.

The Massachusetts winners for *IMAGINING TOMORROW* have been announced at an awards reception held May 11. This is a "continuous-loop" program, with online publication of winning entries, and promotion to the schools for the program for the 2007-2008 school year.

In addition, the regional deadline is extended to the end of the summer, August 31, 2007, allowing for students to participate who are enrolled in creative writing or film-making programs during the summer.

For more information, please contact us at info@theforesightproject.org, and ask about corporate sponsorship opportunities.
